

ACTIVITY

REVIEWING AN IEE

INSTRUCTIONS

1. Review the IEE provided.
2. Consider the questions below in relation to the example IEE provided, first by yourself. Afterward, discuss your understanding with the group.

QUESTIONS

1. What is the recommended threshold determination?
2. What potentially significant environmental impacts does the IEE identify?
3. What conditions are identified in the IEE?
4. How might the conditions identified be translated into mitigation and monitoring measures?
5. Do you think these conditions are robust enough to keep adverse impacts below a significant level?
6. What other information does the IEE contain that may be useful in the development of an EMMP?
7. Does this IEE identify activities that are categorically excluded? If so, how does it justify the categorical exclusions?
8. Does the IEE incorporate climate risk screening? How so?
