

USAID
FROM THE AMERICAN PEOPLE

Pest Management PERSUAP Reports and Operational Field Guides

USAID
FROM THE AMERICAN PEOPLE

Learning Objectives

1. USAID requirements regarding the purchase or use of pesticides
2. Overview the PERSUAP format and contents
3. Review field examples
4. Open discussion with question and answer session

USAID
FROM THE AMERICAN PEOPLE

What are pesticides?

Pesticides are biological, chemical or physical agents used to kill unwanted plants, animals, or disease agents.

What about “natural” or “biological” pesticides?

*Pesticides derived from natural sources (like **Pyrethrum**) are still pesticides.*

*USEPA has fact sheets for “**Biopesticides**”*

USAID
FROM THE AMERICAN PEOPLE

Typical pesticide uses in developing countries

In-field crop protection

Spraying for mosquito and other disease vector control

Dosing of lakes, ponds & lagoons to control disease vectors

Household insect and structural pest control

Stored product protection (seeds, food aid crops, etc.)

Insecticide treated bed nets

Treatment of export crops, fumigation of timber

Outbreak pest control – locusts, rodents, etc.

Livestock tick control-dipping, spraying, pouring

And other uses...

USAID
FROM THE AMERICAN PEOPLE

What do USAID's regulations require?

Simply stated. . .

IF

“Pesticide procurement or use” is part of a proposed activity,

THEN:

Additional environmental analysis is *required*

More
specifically. . .

USAID
FROM THE AMERICAN PEOPLE

Pesticide procurement or use

Procurement includes ..

1. **Direct purchase of pesticides**
2. **Payment in kind, donations, provision of free samples and other forms of subsidies**
3. **Provision of credit to borrowers could be procurement**
4. **Guarantee of credit to banks or other credit providers could be procurement**

Use includes ..

1. **Sale**
2. **Handling, transport, storage,**
3. **Mixing, loading, application**
4. **Disposal**
5. **Provision of fuel to transport pesticides**
6. **Technical assistance in pesticide management, including training**

USAID
FROM THE AMERICAN PEOPLE

Fertilizers are *not* subject to USAID's Pesticide Procedures

Fertilizers are often lumped with pesticides under the generic heading of “agrochemicals.”

BUT the Pesticide Procedures do *not* apply to:

- **Use of synthetic fertilizers**
- **Use of organic fertilizers**

Still, the EMPR can specify and identify good fertilizer use and soil fertility practices,

Refer to LAC Guidelines Chapter 8 for best management practices.

USAID
FROM THE AMERICAN PEOPLE

Regulation 216 and Pesticide Use

USAID Pesticide Procedures, 216.3(b), apply the principles of **Integrated Pest Management (IPM)? to every activity that involves or influences pesticide purchase or use.**

USAID
FROM THE AMERICAN PEOPLE

What is Integrated Pest Management (IPM)?

IPM is an ecologically-based pest management approach which prioritizes:

- The health of crops and their ecological system;**
- Monitoring, degrees of intervention, reduced risk and low toxicity controls such as biological and botanical controls;**
- Actions required when pests reach economically-damaging levels.**

USAID
FROM THE AMERICAN PEOPLE

What is Integrated Pest Management?

In IPM, the use of pesticide is a
“last resort.”

How to select IPM pest control options:

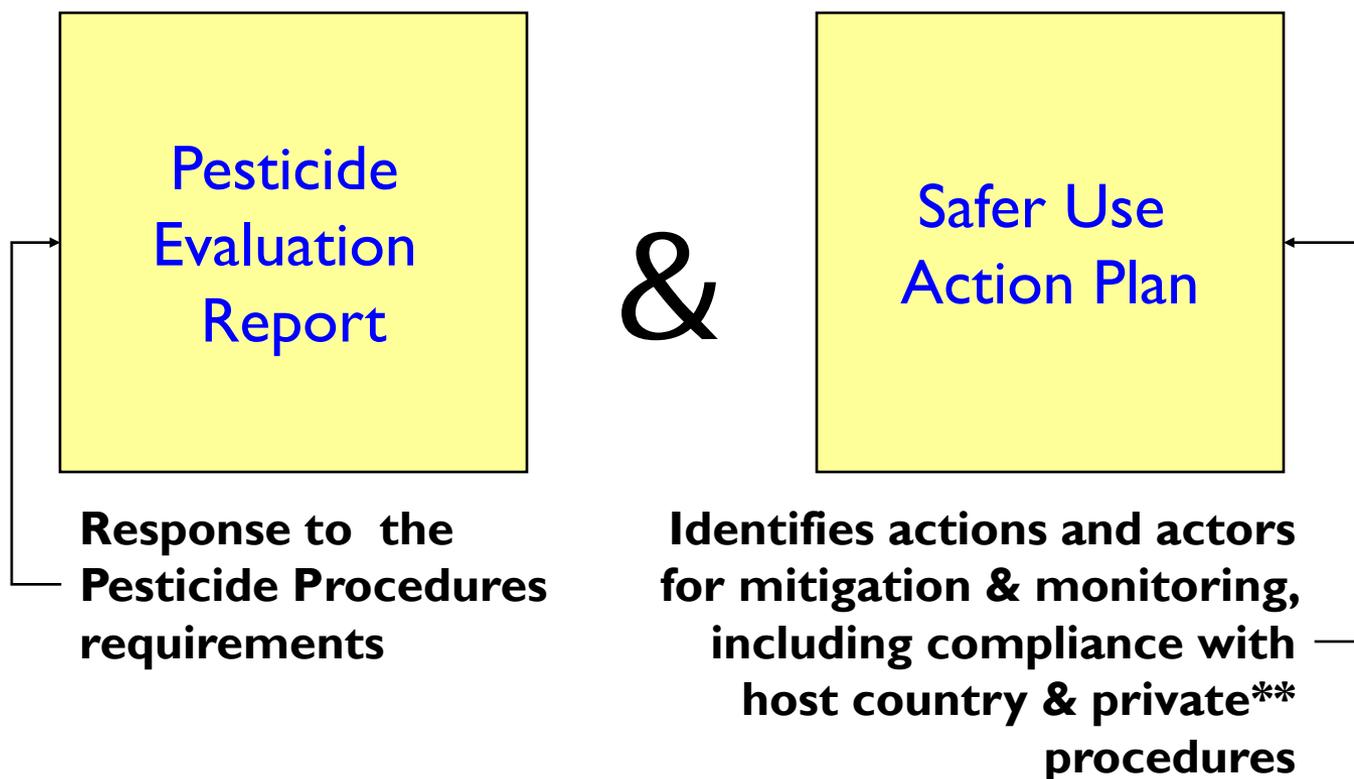

- **Favor the “least toxic” controls**
- **The more selective the control the fewer non- target impacts.**
- **Safe for farmers and their families, safe for consumers,**
- **Safe for the ecosystem.**

USAID
FROM THE AMERICAN PEOPLE

Pesticide Evaluation Report & Safer Use Action Plan (**PERSUAP**)

PERSUAP is triggered by an IEE determination and has two major parts that meet **216.3(b) Pesticide Procedures**:

USAID
FROM THE AMERICAN PEOPLE

Additional Analysis

The **Pesticide Evaluation Report (PER)** includes 12 factors that must be described:

1. US EPA **registration status** of the recommended pesticides;
2. **Basis for selection** of the pesticide;
3. Extent to which the proposed pesticide use is **part of an IPM plan**;

USAID
FROM THE AMERICAN PEOPLE

The Pesticide Evaluation Report must also explain & access:

- 4. Pesticide availability and it's **method(s) of application**;**
- 5. Any **toxic hazards**;**
- 6. **Effectiveness** of the requested pesticide for the **proposed use**.**
- 7. **Compatibility** of the pesticide with the **local ecosystems****

A master farmer ready to spray at a USAID Haiti training center.

Credit Fiona Littlejohn-Carrillo, SMTN 2012

USAID
FROM THE AMERICAN PEOPLE

The Pesticide Evaluation Report must also explain:

- 8. Environmental conditions** under which the pesticide is to be used;
- 9. Availability and effectiveness of other pesticides or non-toxic controls** (*other alternatives?*);
- 10. Host country's ability** to regulate the requested pesticide(s);

- 11. Provisions made for training of users and applicators**
- 12. Provision made for monitoring the use and effectiveness of the pesticide.**

USAID
FROM THE AMERICAN PEOPLE

An adequate pesticide
SAFER USE ACTION PLAN
should *at minimum* do the following:

- **Monitoring plan and reporting**
- **Training, development and distribution of appropriate information, education and communication**
- **Establish pesticide quality standards and control procedures**
- **Require good packaging and clear and adequate labeling**
- **Define and assure safe use practices**
- **Define appropriate methods of pesticide handling, storage, transport, use and disposal.**
- **Assure accessibility of protective clothing and equipment needed.**
- **Discussion of proper handling, use, and disposal of pesticides**
- **Identify Roles and Responsibilities**
- **Disposal provisions for used pesticide containers**

USAID
FROM THE AMERICAN PEOPLE

Mitigation and monitoring for pesticides

**The PERSUAP
requires you to
consider and address
a number of
mitigation and
monitoring measures
proactively.**

The PERSUAP should emphasize...

- **Ensure accurate information on an annual basis (EPA registration and use)**
- **Provision of pesticide training and protective equipment**
- **Monitoring of pesticide use & application techniques**
- **Methods for cleaning and disposal of pesticide containers**
- **Methods of pest control within an IPM and weed management program, organized by crop**

USAID
FROM THE AMERICAN PEOPLE

Mitigation: Exposure Minimization Opportunities

Opportunities to minimize exposure exist before, during and after pesticide use. . .

Consider transport, packaging & storage practices

- **Waiting periods**
- **Clean/bathing**
- **Storage & disposal practices**

- **Choice of formulation and equipment,**
- **Use of buffer zones**

**All options
require training &
monitoring!**

USAID
FROM THE AMERICAN PEOPLE

Additional Recommendations and Best Practices

- **Minimize exposure risks**
- **Minimize product toxicity**
- **Use personal protective equipment (PPE) as required by pesticide label**
- **Enforce Restricted Entry Intervals (REI**) and Pre-Harvest Intervals (PHI**) as specified by EPA registration eligibility decision and label**
- **Follow technical assistance, application rates and dosages from the labels**

USAID

FROM THE AMERICAN PEOPLE

US pesticide labels are legal documents containing language, regulated by the EPA on product use and safety.
