

USAID EIA PROCEDURES QUIZ

Training farmers on how to use pesticides would be recommended for a:

- a) Positive Determination
- b) Negative Determination with Conditions
- c) Categorical Exclusion

A new large-scale irrigation project would require:

- a) An Environmental Assessment
- b) A Pesticide Evaluation Report and Safer Use Action Plan
- c) A Request for Categorical Exclusion

A “no” risk activity that is not exempt or categorically excluded would be recommended for:

- a) A Negative Determination
- b) A Negative Determination with Conditions
- c) A Deferral

The Bureau Environmental Officer must approve submitted documents before activities can be implemented:

- a) True
- b) False

The activity is not well defined, so it should be recommended for:

- a) An Exemption
- b) A Deferral
- c) A Categorical Exclusion

A Deferral must be resolved before implementation of an activity can occur:

- a) True
- b) False

A Pesticide Evaluation Report and Safer Use Action Plan is either an amendment to an Initial Environmental Examination or an attachment to an Initial Environmental Examination.

- a) True
- b) False

All activities have moderate risk and are all being recommended for Negative Determination with Conditions. The following documentation is required:

- a) An Environmental Assessment (or full Environmental Impact Assessment) and Face Sheet
- b) An Initial Environmental Examination and Face Sheet
- c) A one to two page Request for Categorical Exclusion and Face Sheet

The activity is in response to an international emergency, so it may be recommended for an:

- a) An Exemption
- b) A Deferral
- c) A Positive Determination
